## This Month's Deal: 25% Off isABelt

---

I'm not a big fan of belts when it comes to travel (especially ultralight travel); but sometimes they're a necessity. [isABelt](#) solves many of my concerns with belts. It's the world's first patented invisible belt.

This, according to the folks at isABelt: *"Here at isABelt, we know that women often need a belt but don't like the bulky buckles so often go without.....when it's actually needed. No woman wants her underwear peeping out or added girth from a bulky belt buckle..... Affordable and fabulous isABelts are the must-have fashion "fix-it" accessory product... Our belts are TSA friendly and are slim and bulk free!"*

**They're so certain you'll love your [isABelt](#), that they're offering you an exclusive 25% off deal!**

**Simply enter the code [Hobo25](#) to get your discount.**
